

1 P3 C6: general exact depth — status only

Not attempted. No full solution. The [published C6 package](#) says this cell is paused and unattempted. The [repository progress table](#) records C6 as **Skipped** and describes it as the general exact-depth problem. The [cell statement](#) is the authoritative source for its exact requirements.

The [P3 package](#) contains results for earlier cells and finite exact depths through 23 cards. Those results do not constitute a general C6 theorem. This document provides no formula, construction, upper bound, or proof for C6 and is not a solution submission.
